

Tekla Structures 2026

Precast Detailing Production Pipeline

Key logic

Ascending scale loop (Phase 3): 50→60→75→100 until wall fits 255 mm canvas — replaces buggy 50→20 zoom-in.
True center (Phase 4): X = 15 + 255/2 = 142.5 mm — replaces hardcoded, off-center 135.0 mm.
7 dedicated dimension lanes (Phase 5): monotonic 18→90 mm offsets guarantee zero overlaps.
13-point QA gate (Phase 6): automated checks on margins, BOM clearance, dimension-sum integrity, view clashes.
